

Seamless Maritime Consulting

ISM, ISPS & MLC

**Audit, DPA and regional security support,
from consultants who have actually run the ship**

WHY TASMAN EXISTS

The capability of the shore-side support network should keep pace with the capability and ambition of the yacht.

Superyachts operate across many regions, jurisdictions and time zones. We believe owners, Masters and crew should have access to the same quality of shore-side support wherever the yacht happens to be operating.

WHAT WE DO

Specialist shore-side maritime compliance for internationally operated superyachts.

Tasman brings regional expertise across New Zealand, Australia and the wider South Pacific, alongside agreed time-zone support for international management teams.

OUR SERVICES

Practical support, clearly defined around the yacht, its existing management arrangements and the applicable requirements.

01 Compliance Due Diligence & Transitions

Pre-purchase and new-build compliance assessments, SMS development and gap analysis, vessel integration into existing management systems, and Company or Flag transitions, including DOC/SMC application preparation.

02 ISM, ISPS & MLC Audits

Internal audits, independent compliance reviews and gap assessments, including onboard attendance across New Zealand, Australia and the wider South Pacific.

03 Full DPA

Defined shore-side safety management responsibilities, vessel communication, reporting and escalation within the Company's established arrangements.

04 12-hour Regional DPA

Agreed regional working-hour coverage, supporting communication, continuity and escalation across opposing time zones.

05 Alternate DPA

Additional qualified shore-side capacity supporting the existing DPA and Company arrangements, with defined responsibilities and reporting.

06 Regional ISPS & Security Support

Regional maritime security liaison, port and authority coordination, security information and practical assistance alongside the Company's appointed CSO.

Tasman was founded by Craig Hopkins following over two decades in worldwide superyacht command, with maritime compliance experience both aboard and ashore, supported by professional qualifications in internal auditing, DPA and CSO.

We undertake defined independent consultancy assignments or work alongside existing management and compliance teams, bringing practical operational experience, regional knowledge and professional discretion.
